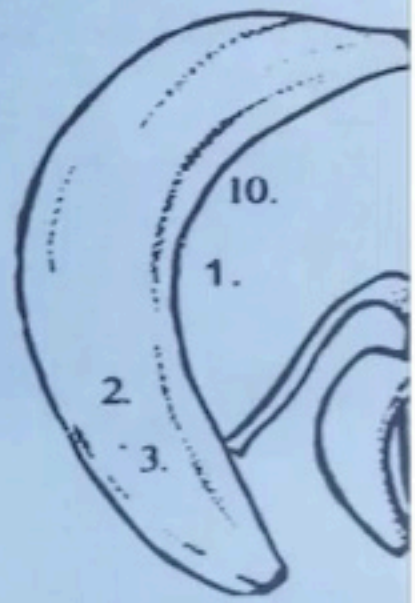
The banana--the atheist's nightmare.

Note that the banana:

1. Is shaped for human hand
2. Has non-slip surface
3. Has outward indicators of inward contents: Green--too early, Yellow --just right, Black--too late.
4. Has a tab for removal of wrapper
5. Is perforated on wrapper
6. Bio-degradable wrapper
7. Is shaped for human mouth
8. Has a point at top for ease of entry
9. Is pleasing to taste buds
10. Is curved towards the face to make eating process easy



15

ADVICE ABOUT BANANAS.

Bananas should be kept in a close room with the temperature not less than 55 degrees, or over 80 degrees. You cannot force Bananas.

You should not hang Bananas where there is any draught. If your bunch of Bananas is half green or some green hands on a bunch, cut the green hands off or take the ripe off, and pack the green in a close barrel, with some salt hay. Put the barrel where it is not too warm, and the bananas will ripen.

GOOD KING BANANA
Friend of Little Folks
For Home, School or Party
If there's green on his coat
He's not quite mellow—
So put him in the fruit bowl
Till all his green is yellow!
A fine fellow—this
In his bright yellow clothes
Just right now for eating;
So in your mouth he goes!
